A training management system is a streamlined version of what you already do on a daily basis to manage your training organization. With features like online registration, course management, CRM and more, you can automate simple processes and manage your entire training business in one central system.

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Nam facilisis lacus ut dictum condimentum. Aliquam erat volutpat. Vestibulum venenatis dictum leo. Topic

Topic Name

ADO.NET is a set of classes to interact with data sources such as databases and XML files. ADO is the acronym for ActiveX Data Objects. ADO.NET provides consistent access to data sources such as SQL Server and XML, and to data sources exposed through OLE DB and ODBC. Data-sharing consumer applications can use ADO.NET to connect to these data sources and retrieve, handle, and update the data that they contain. It has classes and methods to retrieve and manipulate data. ADO.NET consists of classes that can be used to connect, retrieve, insert and delete data.
